Not knowing your destination is half the fun!!!  
Not knowing your destination is half the fun!!!

Use this Anticipation Guide as an introductory activity to gauge your students' understanding of basic moon facts.  
Have them revisit the guide after your unit of study.

## Anticipation Guide: The Moon

Before learning about the moon, decide if you think each statement is true or false. Then, after you read go back and check your answers.

Before Reading	True or False?	After Reading
	The moon is a satellite.	
	Earth has one moon, but some planets have more than one moon.	
	Jupiter has no moon.	
	The moon is bigger than the Earth.	
	The moon is smaller than the sun.	
	The Earth orbits around the moon.	
	There are small amounts of water on the moon.	
	The moon has mountains.	
	The moon makes its own light.	
	The temperature on the moon is always very cold.	
	Only one man has walked on the moon.	
	The moon has more gravity than the Earth.	
	A day on the moon is two weeks long.	
	The moon orbits the Earth once about every 29 days.	
	The moon changes shape.
